FIDLOCK V-BUCKLE

FIDLOCK V-BUCKLE

The **FIDLOCK V-BUCKLE** is a self-securing magnetic closure system that provides rapid attachment and release. This truly unique design creates a high-strength closure through its magnetic and interlocking V-shaped channels. The buckle is constructed of durable glass fiber reinforced polyamide and a stainless-steel flap. The V-buckle is suitable for 1" webbing widths making it a perfect solution for belt and gear fastening.

INSTALLATION INSTRUCTIONS

TO CLOSE:

Align the top half of the **FIDLOCK V-BUCKLE** over the bottom and allow the magnet to snap the buckle closed.

TO RELEASE:

Pull the chord of the buckle away from your body to release the buckle.

ATTACHMENT:

Run 1" webbing through the underside of the buckle webbing slot of each side of the buckle.
