DESIGN

Our lightest, most breathable Combat Pant. Our next generation Hot Weather Combat Apparel is engineered specifically for arid environments and features an extremely lightweight, fast-drying nylon ripstop fabric with MCS Blocker™ to wick away moisture and provide UV protection. Two different high-strength ripstop fabrics provide breathability, stretch, and reinforcement in areas of high wear. Pockets lined in mesh for maximum air-flow and accelerated dry times. Designed for use with our removable **AIRFLEX™ SERIES COMBAT KNEE PADS** (sold separately). Overall minimal design to reduce weight and thermal burden.
