

ATO™ MID LOFT JACKET

APRJL3

DESIGN

The **ATO – ALPINE TERRAIN OPERATIONS™ MID LOFT JACKET** is designed to provide warmth and wind protection when static while avoiding overheating during movement. Constructed with a durable wind resistant nylon fabric that is lightweight and packable. The Polartec® Alpha® Direct insulation is a uniquely constructed knit that does not require a lining layer, reducing the overall bulk but maintaining a high Clo value. The insulation is also highly breathable and designed to allow excellent ventilation during high activity in cold temperatures. Designed to fit over our **G3/G4 UNIFORM** and **Aclima® baselayer tops**, and under the **COMPACT ALPINE OVERWHITES** and under any high lofted outer layer. It can be worn as a concealment outer layer in warmer temperatures and an insulation layer in the cold. It has a roll out helmet compatible hood that is stowed in the collar. Made in US from US materials.

FEATURES

1. Stowable hood with fit adjustment
2. Fleece lined collar
3. Thumb cuffs for increased thermal protection
4. Polartec® Alpha® Direct lining
5. Zippered pockets with glove compatible pulls
6. Interior zippered chest pocket
