9. Ambidextrous design allows pouch to be attached to the left or right side of carrier

DESIGN

The AIRLITE® CONFIGURABLE RADIO POUCH adds a level of comfort and adjustability when wearing a radio on your carrier. Multiple slots on the front and rear allow for a wide range of height adjustment and allows the pouch to be used on the operators left or right side. Additionally, heavy-duty side elastic and adjustable top cord provides a secure fit without interfering with controls on top of the radio. The AIRLITE® CONFIGURABLE RADIO POUCH will adjust to fit most radios and magazines, including the 152, MBITR and two M-4 30 round magazines.
