

CPC™ PLATEBAGS

COVPS1

FEATURES

1. Integrated admin and magazine pouches on the front platebag
2. Rear platebag accepts zip-on panels
3. Can be configured as left-opening or right-opening

NOTE

Using a smaller size platebag will make the vest fit tighter by about 2" in the chest circumference. Using a larger size plate bag will add about 2" to the chest sizing.

DUE TO HIGH DEMAND, LEAD TIME APPLIES (DEPENDENT UPON ORDER DETAILS). New orders will receive lead time update once order has been received. Orders will be filled in the order they are received. Please refer to the **SUPPORT** page for more general ordering information. Contact us for more details regarding availability.

DESIGN

Sold as a set (front and back), platebags are custom fit for each plate size. Make sure to order a set of platebags to complete your **CPC™**. We recommend only using platebags that are either the same size as the vest, one size larger, or one size smaller. For instance, it is not recommended to use small platebags on a large vest. Please note, the **CAGE PLATE CARRIER CPC™** is designed for use with stand-alone plates. If you are using plates that require soft armor backing, a soft armor panel will need to be placed behind the plate. When you order a vest and platebags together, the kit will arrive assembled. Patents pending. Made in US from US materials.
