DESIGN

The G4 Female Field Pant features innovative, custom stretch VTX Ripstop™ fabric. Constructed with Invista's T420 high tenacity nylon fiber to be light yet strong. Integrated stretch and dedicated shaping around the hips allows for a slimmer cut with maximum mobility. Reduced front and back rise, and inseam lengths provide a more tailored fit throughout, while pockets are low profile and engineered to reduce bulk while still allowing room for all essential gear. Mesh venting for maximum air-flow and breathability. Adjustable waistband. Optimized kneepad placement designed for use with all removable AIRFLEX™ SERIES FIELD KNEE PADS (sold separately). All of this combined provides uncompromised performance built specifically for women. Made in the US from US materials.
