3. Rigid tabs for re-indexing
4. Front closure can be modified for FS Tubes® system
5. 1" elastic for breathability
6. Height, fore, and aft adjustments
7. Sold individually

DESIGN

The LPV™ M4 SIDEDRAW CUMMERBUND is designed to maximize cummerbund capabilities while worn with the **LPV™ TACTICAL** or **LPV™ SLICK** plate carrier. A horizontal pouch creates an ergonomic draw stroke and keeps magazines accessible when worn under outer layers. The integration of magazine and armor carriage into an adjustable platform allows for a wide range of positions while remaining form fitting and streamlined. Height, fore, and aft positioning can be adjusted to accommodate any additional equipment. The cummerbund is sold individually so that it can be optionally paired with the **LPV™ MOLLE SIDEDRAW CUMMERBUND**. The multifunctional front closure can be modified for compatibility with the FS Tubes® system. All-new CordDraw™ hardware ensures the magazine is secure and accessible. Passthroughs allow for an optional, double-shock-cord configuration. Made in the USA—Berry compliant.
