

# LVS™ OVERT COVER

LVSCVC

## DESIGN

The LVS™ OVERT COVER optimizes the **LVS™** for wear on top of apparel. Various colors are available and it offers ample VELCRO® areas for agency ID, plus it allows for easy laundering and can accept rifle plates while still being extremely low profile. For the most stable and adjustable plate integration we suggest adding the **LVS™ PLATE HOLDER** inside the cover. This cover is best paired with concealable plates. Plates over ¾" thick are not recommended. Made in US from US materials.
