3. Ambidextrous tab adjusters for customizable fit
4. Drop leg and IWB holster compatible
5. Mates securely with an outer belt
6. 1" MIL-SPEC webbing connection points for multiple buckle options
7. Belt width: 1.625"

DESIGN

The MCS™ (MINIMALIST CARRY SYSTEM) INNER BELT offers high adjustability, comfort, and maximum support in a lightweight package. It's dual adjuster tab design allows the wearer to finetune the fit. The belt features a low profile semi-rigid contoured design that prevents pinching, even when supporting drop leg or IWB holsters. It comes equipped with a side release buckle but can be configured with the included G-Hook buckle for a very low profile setup. It is also compatible with the magnetic **FIDLOCK® V-BUCKLE** (sold separately). Lastly, the MIL-SPEC **VELCRO®** on outer face provides an unbeatable platform for a secure fit when pairing with an outer belt. Made in the US with US materials.
