

FIDLOCK® V-BUCKLE 25

MRBMV1

FEATURES

1. Low profile design
2. Rapid attachment and release
3. Easy installation

DESIGN

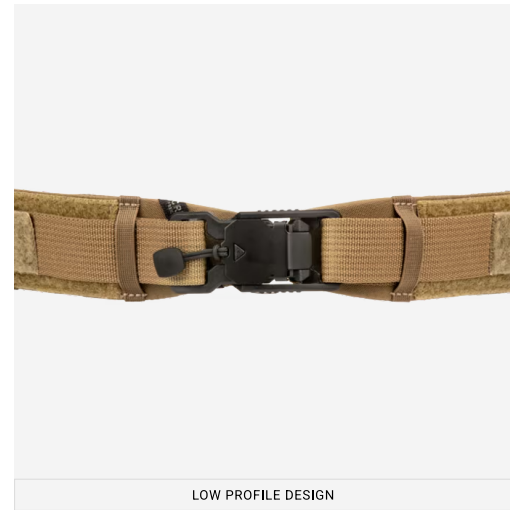

The **FIDLOCK V-BUCKLE** is a self-securing magnetic closure system that provides rapid attachment and release. This truly unique design creates a high-strength closure through its magnetic and interlocking V-shaped channels. The buckle is constructed of durable glass fiber reinforced polyamide and a stainless-steel flap. The V-buckle is suitable for 1" webbing widths making it a perfect solution for belt and gear fastening.
