

R-SERIES™ JPC PADDED INSERT

RSR108

FEATURES

1. Foam padded insert layer between wearer and plate
2. Precut holes reduce weight
3. Insert can be trimmed to customize shape

DESIGN

The **R-SERIES™ JPC PADDED INSERT** provides additional comfort for the **JPC R-SERIES™** vest. The design of the insert addresses pressure points sometimes felt when wearing plates. This lightweight padded layer alleviates those pressure points and reduces fatigue. The insert's shape was designed to protect the spine while also protecting the sternum when worn in the front. Made in the US from US materials.
